EDUCATION

Information Technology and Analytics Bachelor's Degree | Bloomsburg University - Bloomsburg, PA Jan 2024-Dec 2025

- GPA: 3.65/4.00
- Relevant coursework: Network security, IT Fundamentals, Penetration Testing, Secure Systems and Administration
- Dean's List: Spring 2024, Fall 2024, Spring 2025, Fall 2025

EXPERIENCE

Technical Analyst | D2 Integrated Solutions - Oreland, PA Feb 2026-Present

- Provided enterprise-level technical support across hardware, software, and network environments supporting over 1000+ devices.
- Supported Office 365, endpoint security platforms, backup systems, and network services (DNS, DHCP, TCP/IP).
- Analyzed and resolved system performance issues, connectivity problems, and application failures across Windows workstations and servers.

Audio-Visual Technician (Contract) | Premium Event Studios - Ambler, PA Mar 2020-Present

- Implemented and supported live event A/V systems, including sound, video projection, and playback.
- Deployed, configured, and troubleshot A/V equipment under live conditions to ensure reliable performance.

IT Support Specialist | Bloomsburg University - Bloomsburg, PA Mar 2024-Dec 2025

- Provided walk-in support for faculty and students daily to resolve hardware, software and network issues.
- Reimaged and configured computers with Windows OS around campus.
- Assisted with campus network troubleshooting, including connectivity issues throughout different buildings.

Consulting Agent for Geek Squad | BestBuy - Plymouth Meeting, PA June 2025-Aug 2025

- Diagnosed and resolved hardware and software issues for clients computers and mobile devices.
- Performed malware removal, PC upgrades, and network troubleshooting while delivering personalized support.

Electrical Technician (Intern) | Hand Held Legends - Willow Grove, PA June 2025-Aug 2025

- Diagnosed and upgraded controller/console issues using multimeters and soldering tools to restore functionality.
- Assembled and modified custom circuit boards while working with a team to troubleshoot hardware changes.

PROJECT PORTFOLIO

Tech portfolio of unique computer modification projects from 2014 to present day

- **Home Lab Infrastructure:** Built and maintained a dedicated home lab to deploy operating systems, configure services and to test networks in an isolated environment.
- **Recovering Deleted Data:** Recovered deleted files from wiped hard drives using forensic programs.
- **Personal Server running TrueNAS and TailScale:** Converted Desktop into server to run throughout a personal network; configured to send encrypted data while having secure remote access.
